

Compact, robust electronic pressure and leakage testing device with Connected functionality via Bluetooth or USB. With internal compressed air pump  $\leq 150$  hPa/mbar. For battery and corded operation.

Pressure and leakage testing with compressed air/inert gas  $p \leq 0.4$  MPa/4 bar

Pressure and leakage testing with water  $p \leq 2.5$  MPa/25 bar

Usefulness testing of gas installations

Individual check lists, e.g. general visual inspection, house show

For a wide range of accessories, see pages 138–139.

**REMS P7-TD C – for common tests in gas and water installation. Ultra stable plastic housing with soft grip. Efficient usefulness testing by comparative leakage method.**

**Universal use**

Just **one** device for pressure and leakage testing with compressed air/inert gas or water, e.g. drinking water installations, radiator and area heating systems and gas installations. For usefulness testing of gas installations. Also for differential pressure testing  $\leq 150$  hPa/mbar.

**Design**

Compact, robust electronic pressure and leakage testing device, handy and light, measuring instrument only 1.1 kg. Ultra sturdy, impact-resistant plastic housing with soft grip and ergonomically shaped handle. Internal compressed air pump for leakage testing  $\leq 150$  hPa/mbar. Internal electronic pressure sensor  $\leq 0.1$  MPa/1 bar. Plug coupling DN 3 (plug) P+ and P- for pressure hose P7,  $\varnothing 5$  mm, e.g. for usefulness testing, differential pressure measurement or for compressed air hose P7,  $\leq 150$  hPa/mbar,  $\varnothing 6$  mm, e.g. for leakage testing with compressed air. Plug coupling DN 3 (plug) as air input for internal compressed air pump or gas outlet for comparative measurement in usefulness testing. Plug coupling DN 5 (plug) for compressed air hose P7,  $\varnothing 6$  mm, e.g. for pressure testing with compressed air  $\leq 0.35$  MPa/3.5 bar. Jack for connecting electronic pressure sensors. IR interface for connecting a printer. Bluetooth interface for connecting to a mobile terminating device. Mini-USB connector for direct connection to PC or laptop. Connection for power supply/charger 100–240V for mains operation or for charging the battery Ni-MH 4.8V, 2Ah. Magnetic housing rear for easy attachment, e.g. to boilers or other ferromagnetic materials.

**Input and control unit with 3.5" colour display**

Input and control unit with 3.5" colour display with touch function and modern TFT LCD technology, 89 mm screen diagonal, 320 x 240 pixels 2 function keys, 2 navigation keys User-friendly menu guidance takes you step by step through the testing process Easy to understand operating instructions supplemented by context-related help can be displayed at the start of a function. 37 different test programs in 3 pre-installed and 13 online available languages. Date, time, automatic summer time, leakage measurement autostart, pressure sensor damping stage, screen brightness, key tones, pressure setting, calibrate touch display, info window, delete function, language and unit of pressure bar/Pa settable. Display of notices (annual inspection and periodic testing, battery state, firmware version, serial number, etc.). Download and installation of new firmware versions via PC or laptop. Switch-off in case of inactivity settable in 4 stages.

**Battery or mains operation**

Measuring instrument with integrated Ni-MH 4.8V, 2Ah battery. Light and powerful. High energy density for approx. 10 hours continuous operation. Operation on the mains is possible during the charging process. Power supply/charger 100–240V, 12W. No memory effect for maximum battery power.

**Pressure hoses, electronic pressure sensors**

Pressure hose P7,  $\varnothing 5$  mm for measuring gas and flow pressure or for usefulness testing. Compressed air hose P7,  $\leq 150$  hPa/mbar,  $\varnothing 6$  mm, for leakage testing with compressed air/inert gas  $\leq 150$  hPa/mbar. Compressed air hose P7,  $\varnothing 6$  mm, for pressure testing with compressed air/inert gas  $\leq 0.35$  MPa/3.5 bar. Electronic pressure sensor  $\leq 0.35$  MPa/3.5 bar for pressure and leakage testing with compressed air/inert gas  $\leq 0.35$  MPa/3.5 bar. Electronic pressure sensor  $\leq 2.5$  MPa/25 bar for pressure and leakage testing with compressed air/inert gas  $\leq 0.4$  MPa/4 bar or with liquid  $\leq 2.5$  MPa/25 bar. Compact manual compressed air pump  $\leq 0.4$  MPa/4 bar, double-sealed for fast, accurate pressure build-up  $\leq 0.4$  MPa/4 bar, with connection for Schrader valve.

**Time/pressure diagram**

Time/pressure diagram for recording the pressure curve over the complete testing time for easy assessment of the tightness.

German Quality Product

**REMS mCon App**  
Free application software from the Apple App Store or Android App at Google Play.

### Pressure testing with compressed air

Leak testing of drinking water installations with compressed air in accordance with information leaflet "Leak testing of drinking water installations with compressed air, inert gas or water" (January 2017) of the Central Association for Sanitary, Heating and Air Conditioning (ZVSHK), Germany

Leak testing of gas installations with compressed air in accordance with the Technical Rule "DVGW-TRGI 2018, Technical Rules for Gas Installations – DVGW Worksheet G 600" of the German Gas and Water Association (DVGW)

Leak testing of other pipe systems and vessels with compressed air/inert gas  
Load testing of drinking water installations with compressed air in accordance with information leaflet "Leak testing of drinking water installations with compressed air, inert gas or water" (January 2017) of the Central Association for Sanitary, Heating and Air Conditioning (ZVSHK), Germany

Load testing of gas installations with compressed air in accordance with the Technical Rule of gas installations with compressed air in accordance with Technical Rule "DVGW-TRGI 2018, Technical Rules for Gas Installations – DVGW Worksheet G 600" of the German Gas and Water Association (DVGW)

Load testing of other pipe systems and vessels with compressed air/inert gas.

### Pressure testing with water

Pressure testing of drinking water installations with water in accordance with EN 806-4:2010 Test methods A and B, modified in accordance with information leaflet "Leak testing of drinking water installations with compressed air, inert gas or water" (January 2017) of the Central Association for Sanitary, Heating and Air Conditioning (ZVSHK), Germany

Pressure testing of drinking water installations with water, press fitting connections (unpressed leaking) in accordance with information leaflet "Leak testing of drinking water installations with compressed air, inert gas or water" (January 2017) of the Central Association for Sanitary, Heating and Air Conditioning (ZVSHK), Germany

Leak testing of other pipe systems with water/liquid

### Usefulness testing of gas installations

Efficient, simple usefulness testing by comparative leakage method, without dismantling the gas meter, without volume determination and without increasing pressure.

Usefulness testing of gas installations in accordance with the Technical Rule "DVGW-TRGI 2018, Technical Rules for Gas Installations – DVGW Worksheet G 600" of the German Gas and Water Association (DVGW). DVGW-certified, register number **DG4805BS0029**.

### Other functions/applications

See product comparison on page 137.

### Logging

Results of the measuring and test programs are saved with date, time and log number in the selected language and can be printed, stored or sent for documentation. Printer with Bluetooth or IR interface for direct log printing, as an accessory. Additions to saved data, e.g. customer name, project number, tester, are possible on external devices (e.g. PC, laptop, tablet-PC, Smartphone).

### Connected-functionality via Bluetooth with REMS mCon App

If a mobile terminating device is connected via Bluetooth, many different functions are available with the REMS mCon app. For functions/applications, see page 137.

### Connected functionality via USB with REMS PC-Software PC200P

If a PC or laptop is connected via USB, many different functions are available with the REMS PC-Software PC200P. For functions/applications, see page 137.

### Supply format

**REMS P7-TD C Set.** Electronic pressure and leakage testing device with Connected functionality via Bluetooth or USB. For the usefulness testing of gas installations, for the pressure and leakage testing of pipe systems and vessels  $\leq 2.5$  MPa/25 bar. With internal compressed air pump  $\leq 150$  hPa/mbar, internal electronic pressure sensor  $\leq 0.1$  MPa/1.0 bar. With equipment  $\leq 0.1$  MPa/1.0 bar. 2 pressure hoses P7,  $\varnothing$  5 mm, transparent, 1 m long, with plug coupling DN 3 (socket) and silicone tubing, compressed air hose P7,  $\leq 150$  hPa/mbar,  $\varnothing$  6 mm, transparent, 2 m long, with plug coupling DN 3 (socket) and quick coupling DN 5 (plug), compressed air hose P7,  $\varnothing$  6 mm, 2 m long, with quick coupling DN 5 (plug, socket), air pump connection piece with Schrader valve,  $\leq 0.4$  Mpa/4 bar, adapter quick coupling DN 5 to R  $\frac{1}{2}$ " AG, manual compressed air pump  $\leq 0.4$  MPa/4 bar. Power supply/charger 100 – 240V, 50 – 60Hz, 12W. Cable Mini-USB to USB-A. In L-Boxx system case.
