

Professional, electronic bore hole centre tracking device for exact determination of the in and out centres when drilling through-bores and for automatic display of the material thickness.

Different materials, e.g. concrete, steel-reinforced concrete, all kinds of masonry, wood and others, material thickness $\leq 120\text{ cm}$

REMS Detect B – for exact determination of the in and out centres of through-bores.

Professional, electronic bore hole centre tracking device consisting of a transmitter and receiver unit, for exact determination of the in and out centres when drilling through-bores and for automatic display of the material thickness $\leq 120\text{ cm}$.

Ideal for aligning the core drilling machine and positioning the drill at the in centre as well as selecting the drill bits. With acoustic and optical navigation with red/green LEDs and display with LED technology.

No test bores required, therefore particularly suitable for use in finished rooms, e.g. in residential, office or industrial buildings.

Supply format

REMS Detect B Set. Professional, electronic bore hole centre tracking device consisting of a transmitter and receiver unit. With acoustic and optical navigation with red/green LEDs and display with LED technology, battery charge indicator with LED, 6 batteries 1.5 V, AAA, LR3, frequently reusable adhesion points, in sturdy case.
